

ZAGREB, 22-23 April 2021

European Conference on Architectural Policies - virtual

The European Conference on Architectural Policies RE-USE ARCHITECTURE will be held in April this year as a virtual one, after the conference of the same name that we organized under the auspices of the Croatian Presidency of the Council of the European Union in June 2020 was canceled. The COVID-19 pandemic and the earthquake that hit Zagreb in March 2020 made it impossible for participants to meet live in Zagreb and Rijeka.

This series of events, accompanied by new earthquakes with the epicenter in the Sisak-Moslavina County, showed all the vulnerability of physical space and the need to increase the resilience of cities to contemporary challenges. At the same time, they strengthened our intention to contribute to the consideration of these issues by organizing a virtual conference.

The conference is thematically focused on questions of rehabilitation and revitalization, activation of degraded, abandoned and overlooked areas, reuse of neglected zones or individual structures, as well as their circular management.

The aim is to bring together experts who can, by sharing their experiences, be an inspiration for future actions on urban renewal and recovery of affected areas, with the aim of increasing their resilience. The results of European cooperation on defining the quality criteria of architecture and built space and a review of available sources of financing will certainly contribute to the creation of architectural policies of the Republic of Croatia for the future period.

The conference is organized by the Ministry of Physical Planning, Construction and State Assets, Institute for Spatial Development in cooperation with the Croatian Chamber of Architects.

It is intended for architects and spatial planners, policy makers at all levels, other interested experts, as well as the general public.

There is no registration fee, while the participation for members of the Croatian Chamber of Architects and Croatian Chamber of Civil Engineers is validated as part of the system of continuous professional development.

REGISTRATION

PROGRAM is organized as two half-day events:

Thursday	22 April 2021	10:00 - 14:30
Friday	23 April 2021	10:00 - 14:00
